CASE STUDY: INTERNATIONAL CONGRESSES

For the 14th Asia Security Summit, the International Institute for Strategic Study (IISS) used the innovative E Ink Electronic Nameplate to display the name of attendees in the room and on the podium. The solution worked flawlessly during the 3-day conference for key national security advisors and Defense Ministers.

Media Vision provided 70 TAIDEN E Ink Electronic Nameplates, as a standalone solution independent from the existing conference system. Media Vision's product specialist was onsite to setup the system and to change the names displayed from session to session. In between sessions, all nameplates were displaying the logo of the organization.

The E Ink Electronic Nameplate offers an elegant, cost-effective and eco-friendly solution to identify attendees at meetings. E Ink is an acclaimed non-glaring and low-consumption technology.

PROJECT HIGHLIGHTS

- > E Ink Display Technology
- > Stand-Alone System
- > Events Solution

EQUIPMENT	MODEL #	DESCRIPTION	QTY.
	TAIDEN HCS-1080	Wired E Ink Nameplate	70
